

## Annual Report – Vice President, October 20, 2012

Submitted By:	Andy Romanovych – Vice President
<b>Accomplishments</b>	
	<ul style="list-style-type: none"> <li>• Support for younger Provincial Program athletes during training, camps and at races</li> <li>• Assessed equipment for races, including small trailer</li> <li>• Attended nearly all Board meetings</li> </ul>
<b>Issues Resolved</b>	
<b>Goals for Next Year</b>	
	<ul style="list-style-type: none"> <li>• <b>Coaching concerns:</b> as stated in the duties of director’s policy, the V.P. shall be responsible for scheduling and delivery of programs for the development of NCCP certified cycling coaches in MB. After attending the PP/parents meeting, the PP coach is doing these duties, adding to his ever growing list of responsibilities. It was suggested that a sub-committee be formed to provide input, assist/collaborate with the PP coach to ensure proper direction and qualifications of coaches.</li> <li>• <b>KOM:</b> should be encouraged to attend the Wed. night series racing as a great way to further introduce them to racing and competing.</li> <li>• <b>Equipment:</b> I attended / participated in many events during the summer and noticed a lot of our equipment is old, broken or non-existent. We could have used some crash cushions at the Provincial MTB race, and we could use a proper start / finish gate at all our events.</li> <li>• <b>Venue investment:</b> I think we really need to think where we are spending our resources and improve on existing programs. BMX has gotten grants to try and kick start their program and we need this same kind of funding to improve our existing venues so that our PP athletes are prepared better for out of province events.</li> <li>• <b>BMX:</b> We need to be cautious about the BMX program-it doesn’t seem to be sustainable long term due to the costs alone.</li> <li>• <b>Provincial Program:</b> After attending the PP / parents meeting, there needs to be more support for the whole program; the athletes and coaches could be better supported, the MCA needs to support it better.</li> </ul>
