

## April Report – Vice President

Submitted By:	Andrew Romanovych
Date:	18-June-2012
Comments & Updates:	New developments or concerns
Issues / Concerns / Recommendations:	BMX Program Mountain bike venues
<p>In regards to the BMX program I still feel that there is no clear picture as to where the whole thing is headed. Can we be sure that we can sustain and support this program without jeopardizing other disciplines.</p> <p>Having just returned from National MTB championships that were held in Quebec I return with higher hopes and aspirations in that we can grow our MTB program here. Having just raced on the most impressive MTB course, demonstrated the need for us to further develop and improve on what we have, to ensure our athletes will be able to compete at National or cup events. Based on increased participation in KOM and Developmental Program we have a really good crop of young MTB athletes.</p> <p>We need to start developing one of our existing MTB venues to National standards, before MCA diverts further funding to new programs such as BMX.</p>
